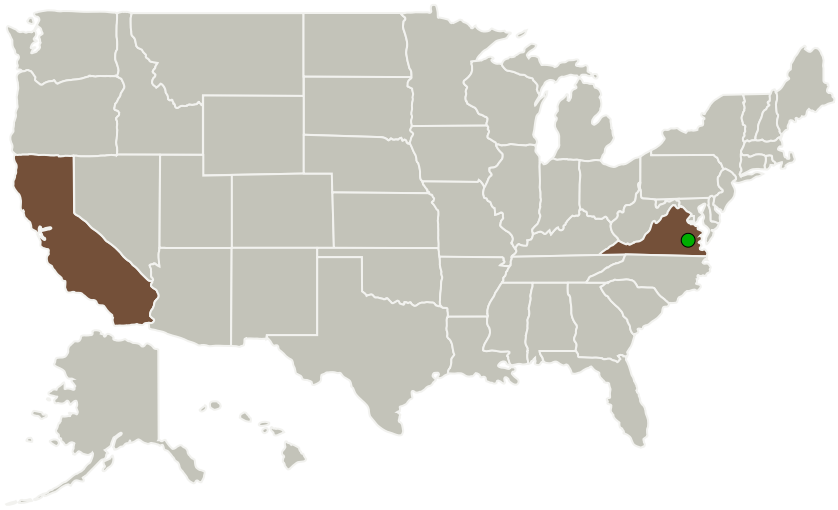
Spatially Coherent Optical Velocimeter Array for Rapid Guided-wave NDE, Phase II

Completed Technology Project (2015 - 2018)

Project Introduction

The pace and progress of new sensor technology development continues to lag far behind the broad ranging potential offered by guided wave NDE. In response to NASA solicitation H13.01 for Advanced NDE Techniques for Complex Built-up Structures, Advanced Systems and Technologies Inc., propose a collaborative program which seeks to combine an advanced sensor technology for rapid wide-area capture of ultrasound wave-field data with recent advances in NDE guided wave signal processing. This proposal describes how the Spatially Coherent Optical Vibrometer Array (SCOVA), combined with chirped ultrasound excitation and narrow tone-band decomposition provide deep data sets for application of new spatio-temporal and spatio-spectral analyses to address a broad range of NDE functions pertinent to NASA spaceflight structures. In form and function, SCOVA offers a sensor geared towards practical deployment of guided wave NDE. The ability of SCOVA to capture swept ultrasound data at hundreds of points simultaneously, offers a major advancement in the practical application of guided wave NDE targeting multiple defect modalities in current and future complex spaceflight structures.

Primary U.S. Work Locations and Key Partners



Spatially Coherent Optical Velocimeter Array for Rapid Guided-wave NDE, Phase II

Table of Contents

Spatially Coherent Optical Velocimeter Array for Rapid Guided-wave NDE, Phase II

Completed Technology Project (2015 - 2018)

Organizations Performing Work	Role	Type	Location
Advanced Systems & Technologies, Inc.	Lead Organization	Industry	Irvine, California
Langley Research Center(LaRC)	Supporting Organization	NASA Center	Hampton, Virginia

Primary U.S. Work Locations	
California	Virginia

Organizational Responsibility

Responsible Mission Directorate:
Space Technology Mission Directorate (STMD)

Lead Organization:
Advanced Systems & Technologies, Inc.

Responsible Program:
Small Business Innovation Research/Small Business Tech Transfer

Project Management

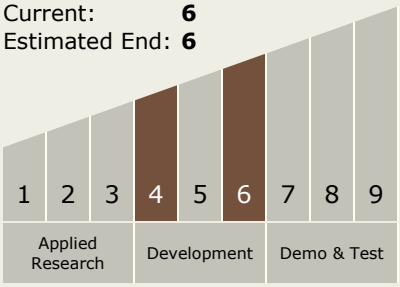
Program Director:
Jason L Kessler

Program Manager:
Carlos Torrez

Principal Investigator:
James M Kilpatrick

Technology Maturity (TRL)

Start: **4**
Current: **6**
Estimated End: **6**



Spatially Coherent Optical Velocimeter Array for Rapid Guided-wave NDE, Phase II

Completed Technology Project (2015 - 2018)

Technology Areas

Primary:

- TX12 Materials, Structures, Mechanical Systems, and Manufacturing
  - TX12.4 Manufacturing
    - TX12.4.5 Nondestructive Evaluation and Sensors

Target Destinations

The Moon, Mars, Outside the Solar System, The Sun, Earth, Others Inside the Solar System
